## ADVERTISEMENT: FORMAL WRITTEN PRICE QUOTATION FOR SEVEN DAYS NOTICE

**BID NO: RFQ02/2024/25**

**Dikgatlong Municipality** hereby invites suitably prospective service providers to quote for supply, delivery and installation of **mechanical water level indicators**. **Sealed** Price quotations clearly marked **“RFQ02/2024/25 SUPPLY, DELIVERY AND INSTALLATION OF MECHANICAL WATER LEVEL INDICATORS”** endorsed on the envelope” must be submitted to the Dikgatlong Local Municipality, 33 Campbell Street, Barkly West, 8375. Bids **must** reach the municipality before **12h00 on Thursday the 25<sup>th</sup> of July 2024**.

### BACKGROUND AND SPECIFICATIONS/ SCOPE OF WORK

It is currently difficult for the water team to manage and monitor the water levels in our reservoirs because there are no water level indicators at any of our water storage facilities. The Water Section therefore requires that water level indicators be installed at the following sites:

- Barkly West Water Storage Facility
  - 2 concrete ground level reservoirs
  - 2 elevated steel tank reservoirs
- Windsorton Water Treatment Works
  - 3 concrete ground level reservoirs
- Delportshoop
  - 2 concrete ground level reservoirs
  - 1 elevated steel tank reservoir
- Longlands
  - 1 elevated steel tank reservoir

The specifications are as follows:

- The construction must be of a rugged nature (Tough, reliable and almost maintenance free).
- Preferred construction must include the “pulley” system in a stainless-steel housing, stainless steel guide-bar, high-grade polyamide pulleys, durable cord and float.
- The pulley system must consist of two cords connecting to the float, a counterweight and a water level marker. As the float rises or drops on the tanks’ changing water levels, the counterweight movement causes the water level marker to move in perfect unison with the movement of the float. The position of the water-level marker thus always provides a true reading of the water level in the tank.
- The Bidder/Supplier must also provide a guarantee for all parts for at least 3 years. Level indicators must have a water level marker which show different water levels at intervals as follows:
  - Empty,

- 1/8,
- 1/4,
- 1/2 ,
- 3/4, and
- Full
- Training to be provided to operators on site on how to operate and maintain the water level indicators.
- Delivery and installation addresses will be at the different sites as indicated above.
- Delivery and installation should not be more than 6 weeks after appointment is made.
- Bidders should indicate the specifications of their product/s and indicate if it meets the minimum specifications. It is therefore important that prospective bidders include with this bid document the full specifications for the equipment from the manufacturers.

Prospective bidders are requested to familiarize themselves with the different sites to have a clear indication on the shape, sizes and heights of the water storage facilities. We therefore require that the prospective bidder arrange a site inspection in order to ensure he quotes for the correct items/work. Mr D Makaleni can be contacted at 072 614 9798 for a site visit before the close of the RFQ.
